

Job Title: Sr. Software Engineer - Full Stack MEAN

New Delhi, India | Full Time

Company Description

SenRa, a contributing member of the LoRa Alliance™, is a Low-Power Wide-Area Network (LPWAN) provider for IoT/M2M applications. We provide long distance communication for LoRa enabled devices leveraging open standards architecture of the global LoRa Alliance™. Our connectivity services are available at fractional costs of competing technologies such as cellular, Wi-Fi, or satellite networks with the benefits of a LPWAN – Wide coverage (up to 20 km coverage from a single gateway) and low power (several years of battery life).

Job Summary

SenRa is looking for *rockstar* full stack technical architect who can help us kickstart development of customer centric portals and effective network management applications. The ideal candidate will be responsible to come up with visually appealing UI and transforming a wireframe to a working application. Candidate will also work closely with the CTO to make strategic decisions for the future roadmap of the product. She/He will be expected to demonstrate capability to design the overall architecture of the portal

The successful candidate will work closely with our development and design teams to update the website and internal web tools to make them more efficient. The developer will also be responsible for creating innovative solutions to web design issues to help make the website more visually appealing and enhance usability.
